Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jensvold et al(5409524).

Jensvold et al teaches a microporous polymer membrane comprising micropores that have been reduced in size from a first size to a second size by heat treatment , the second size being large enough to generally allow migration of a gas through the microporous polymer membrane and small enough to generally prevent migration of a liquid into the microporous polymer membrane, wherein the microporous polymer membrane is an amorphous fluoropolymer(column 2 lines 55-56, noting 9,9-bis(3,5-bis(3,5-dibromo-4-hydroxyphenyl)fluorene).

Allowable Subject Matter

Claims 1-14 and 22-26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Applicant notes that the current application and Spadaccini et al were, at the time of the invention of the current application, commonly owned. Therefore, as noted by

Applicant, the Spadaccini et al reference is disqualified as prior art. Therefore, the previous rejections to claims 1-14 and 22-26 are withdrawn.

Response to Arguments

Applicant's arguments filed 9-5-06 with regards to claims 15-21 have been fully considered but they are not persuasive.

Applicant argues Jensvold fails to disclose or suggest a microporous polymer membrane made of amorphous fluoropolymer as recited in Applicant's claim 15.

Examiner respectfully submits that Jensvold clearly teaches in column 2 lines 54-55 an amorphous fluoropolymer membrane. Examiner respectfully submits that the membrane can be an asymmetric membrane, as noted in column 3 lines 29-33, wherein the membrane has no definite form, which clearly meets the guidelines for an amorphous structure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1724

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
